your stored information securely

A Secured Digital Safe for: Presentations, Passwords, Spreadsheets, Homework, Personal Data, or any Information you want to protect. BioStik™ is a portable flash memory storage device combined with biometric fingerprint-scanning technology for a secure way to transfer, store and transport your information. The BioStik™ reads your fingerprint in less than 1 second for individualized access to your sensitive or confidential information and data files. No passwords used. Simply plug into your USB port, authenticate your fingerprint, and the removable hard drive on your PC becomes available for file storage. Just "Drag and Drop" your files. **Transporting and securing data has never been so mobile and efficient.**
